

Mini-symposia proposal

Description

Mini-symposium proposal

The deadline for submitting mini-symposium proposals was February 5th. There is still time to submit poster contributions at [Participation > abstract submission](#).

Mini-symposia are thematic sessions focused on specific topics and proposed by participants of the conference. Each mini-symposium session will include either 4 or 8 presentations and will be hosted by one or two organizers.

We encourage diversity in terms of the speakers geographic origins and a balance of covered topics in every proposed mini-symposium.

To submit a mini-symposium proposal, the primary organizer must log in and provide the following details:

- Title of the mini-symposium.
- Name(s) of the organizer(s).
- Mini-symposium abstract (2000 characters or fewer).
- For each contribution in the mini-symposium, please include the following information:
 - Title.
 - Presenting author's name and affiliation.
 - Other authors.
 - Abstract (2000 characters or fewer).
 - Up to 3 references in DOI format.

The number of slots for mini-symposia is limited, so the Scientific Committee will strive to enhance the diversity and appeal of the chosen proposals. When submitting, organizers have the option to consider their mini-symposium for standard talks or posters in case it does not meet the required level of priority.
